CAREER OBJECTIVE

Web development is my interesting category in IT field, In this web development.I manage to attractive font color style css help to my project best perform.web development is creative and making a new project i will interest a lots of this field.i create a basic of project to use html and css language.so yaa web development is my carrier option.

PROJECTS

1) MyPortfolio —

- In this project I will show my resume download option and my skill ,Education details of that.
- It is simple to use some colors to use attractive web pages . In this project I will use html and css language to use and css implement a flex space.
- Project would be the basis of my introduction. I try to best in this project and time to make is project is 6 days
- I think this project should be attractive to me so I implemented them. I just saw a project format on youtube then I tried to make this project.
- I help to make this project better. This project is a youtube css tips and tricks channel to implement the css part and I combine all html document css in one css folder so this is good to me.
- Click on the **Link** and see my Output.

2)Learning Programing site —

- This project is the help of a learning platform of the best website and best video to learn programming languages.
- In this learning project I will use hover property and some creating css property.
- I used basic html and css and some js property i used to action the fill form and pop up alert message.
- This is my second project. There will be some practice of html , css and js.
- I made this project of interesting and creative simple fonts and color.
- This is link of that project so click this **Link** word and see my project
